

Tholus Landmark - Preliminary study brief

Summary for management, designers and procurement

Models and starting TUN supplies

MODEL	DIAMETER	INDICATIVE CAPACITY	TUN SUPPLY FROM
Landmark 9	9 m	55-65	CHF 159'000
Landmark 15	15 m	130-145	CHF 349'000
Landmark 20	20 m	200-220	CHF 789'000
Landmark 25	25 m	320-345	CHF 989'000
Landmark 30	30 m	450-510	CHF 1'349'000

Commercial scopes and responsibilities

TUN SUPPLY

Tholus system

Rigid dome, screen, multi-projection, audio, server, software, starter content, training, TholusOS Enterprise and warranty.

WITHIN TUN SCOPE

Design and commissioning

Detailed system design, technical coordination, assembly, calibration, testing, commissioning, documentation and certifications within our responsibility.

OUTSIDE TUN SUPPLY

Building and local works

Building, foundations, building permits or other approvals that may be required, masonry, services, local utility connections and bases other than the standard PVC flooring we supply are the client's or local design team's responsibility.

OUTSIDE INITIAL INVESTMENT

Maintenance and operating costs

Staff, energy, planned maintenance after the included period, consumables, uncovered spares and software renewals are planned separately.

Prices exclude VAT. Configurations and responsibilities are confirmed against the real site.

Inputs required to start the study

01

Location and intended use

02

Plans, sections and clear height

03

Expected audience and seating layout

04

Structural constraints, access and building services

05

Schedule, approvals and technical stakeholders

First step

Send the location, available measurements, expected audience and project status. We return the initial checks, missing information and the scope of the preliminary study.
